PROFESSIONAL SUMMARY

AI Automation and Lead Generation Specialist with a formal foundation in Computer System Design & Programming and hands-on experience building AI-powered automations, web applications, API integrations, and business workflows. Experienced with n8n and Make.com for workflow automation, lead generation, data processing, and AI integrations. Uses AI-assisted development to build and validate end-to-end software solutions while applying programming, debugging, system analysis, and problem-solving fundamentals. Bring additional professional experience in customer operations, technical support, risk operations, and financial account processes.

CORE TECHNICAL SKILLS

AI & Automation

- n8n, Make.com, AI Agents, LLM Integration, Prompt Engineering, Workflow Automation, Webhooks, API Integration, Lead Generation, Data Enrichment

Software Development

- JavaScript, TypeScript, HTML, CSS, React, Next.js, Node.js, REST APIs, Full-Stack Web Development, Database Integration

AI-Assisted Development

- AI-Assisted Coding, Application Prototyping, Debugging, Code Review, System Architecture, Technical Troubleshooting

Cloud & Development Tools

- Git, GitHub, Docker, Vercel, Firebase, Supabase, Cloud Services
-

SELECTED AI & SOFTWARE PROJECTS

AI Bookkeeper — Full-Stack AI Application

React / Node.js / Firebase / Gemini / Cloud Run

- Built an AI-assisted bookkeeping application for personal and business financial transaction management.
 - Developed frontend and backend functionality with authentication, transaction handling, categories, and database integration.
 - Integrated AI functionality into the application to support intelligent financial workflows.
 - Worked across the full application stack, including frontend, backend, database, AI integration, and deployment.
-

Assemblyreel.io — AI Video Generation SaaS

Next.js / TypeScript / Supabase / AI APIs / Remotion

- Developed an AI-powered video creation platform using modern full-stack web technologies.
- Integrated AI-driven content generation workflows for script, visual, audio, and video production.
- Built application features connecting frontend interfaces, backend services, databases, and external AI APIs.
- Implemented browser-based video editing functionality using a timeline-based workflow.

AI Lead Generation & Outreach Automation

n8n / Make.com / APIs / Data Enrichment / Email Automation

- Built automated workflows for lead collection, data enrichment, verification, filtering, and outbound campaigns.

- Integrated external APIs and automation tools to reduce repetitive manual lead-processing tasks.
 - Designed conditional workflows using webhooks, routers, filters, and error-handling logic.
 - Supported AI-powered appointment-setting and business outreach workflows.
-

PROFESSIONAL EXPERIENCE

AI Automation & Lead Generation Specialist

Robots Helper Inc | April 2026 – Present

- Build and maintain AI-powered automation workflows using n8n and related business tools.
 - Develop lead-generation systems involving prospect research, scraping, data enrichment, verification, and outreach automation.
 - Integrate APIs, webhooks, AI services, and third-party platforms into automated business workflows.
 - Support AI appointment-setting and customer acquisition systems for business clients.
 - Use AI-assisted development and technical problem-solving to improve and test automation processes.
-

INFOSYS BPM | Senior Processing Executive — Account Security & Claims

Mar 2025 – Sep 2025

- Managed account-security and claims processes for a financial service account.
 - Handled sensitive customer and financial information while following established security and compliance procedures.
 - Investigated account concerns, reviewed documentation, and resolved customer issues accurately.
-

VALOR GLOBAL PHILIPPINES | Customer Care Specialist

Mar 2024 – Jan 2025

- Supported T-Mobile customers with accounting, billing, and technical concerns.
 - Guided customers through available solutions and self-service processes.
 - Resolved customer issues while maintaining accurate account handling and communication.
-

UBIQUITY GLOBAL SERVICES | Risk Operations Analyst

Sep 2022 – Jan 2024

- Reviewed financial accounts and documentation to identify potential fraud and account security issues.
 - Performed customer identity verification and documentation review.
 - Followed risk and compliance procedures while resolving account-related concerns.
-

247.AI PHILIPPINES | Customer Service Representative

Jun 2020 – Feb 2022

- Assisted customers with online orders, package tracking, billing, and payment-related concerns.
 - Investigated transaction issues and provided timely customer support.
-

CSS CORP | Customer Support Engineer

Jan 2020 – Jun 2020

- Provided technical support through phone, email, and chat.
- Assisted users with platform onboarding, troubleshooting, and account-related issues.

- Guided customers through technical processes and platform functionality.
-

EDUCATION

AMA Computer College Makati

Associate degree, Computer System Design & Programming | 2017 – 2019

Relevant coursework: HTML, CSS, JavaScript, C, Visual Basic .NET, Microsoft ASP.NET, Object-Oriented Analysis & Design, Database Management, Application Testing.

ADDITIONAL

Languages: English, Filipino

Availability: [Full-time / Remote / etc.]
